

# Inequalities in the disease burden in Scotland: an area level analysis using Scottish Index of Multiple Deprivation

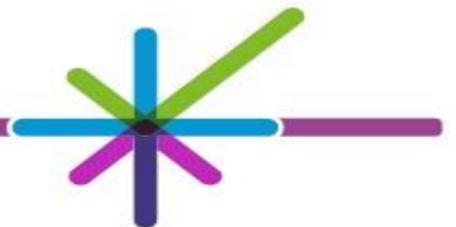

**COST Action CA18218–European Burden of Disease Network workshop on Integrating social inequalities in the burden of disease framework, European Public Health Conference, November 11<sup>th</sup> 2022, Berlin.**

I Grant, E Fletcher G McCartney M Thrower G Wyper D Stockton

# Outline

- What is Scottish Index of Multiple Deprivation (SIMD)
- How is it constructed?
- Strengths/limitations of SIMD
- Applying SIMD in burden of disease analysis

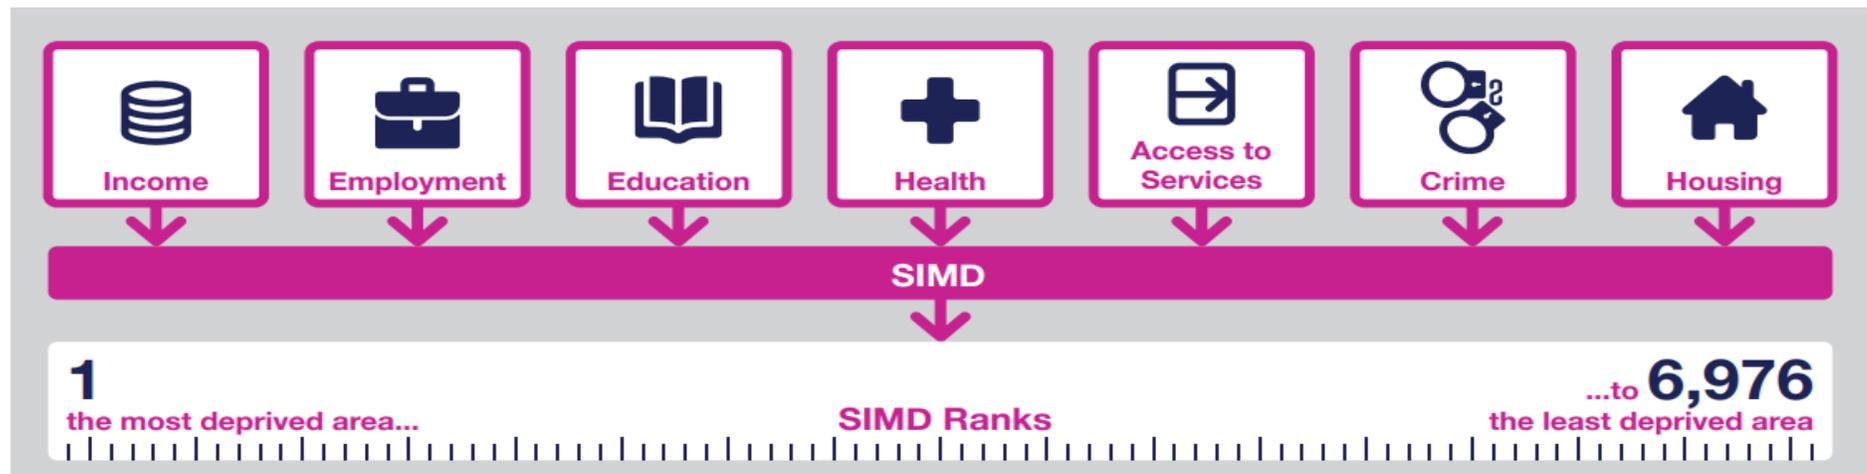

# What is Scottish Index of Multiple Deprivation?

- The Scottish Index of Multiple Deprivation (SIMD) 2020 is the Scottish Government's official tool for identifying concentrations of material deprivation in Scotland.
- SIMD20 is the Scottish Government's sixth edition since 2004.
- Is a relative measure of deprivation across small areas in Scotland.
- Used to target programmes aimed at reducing socioeconomic inequalities in health
- Looks at multiple deprivation. 'Deprived' does not just mean 'poor' or 'low income'. It can also mean people have fewer resources and opportunities, for example in health and education

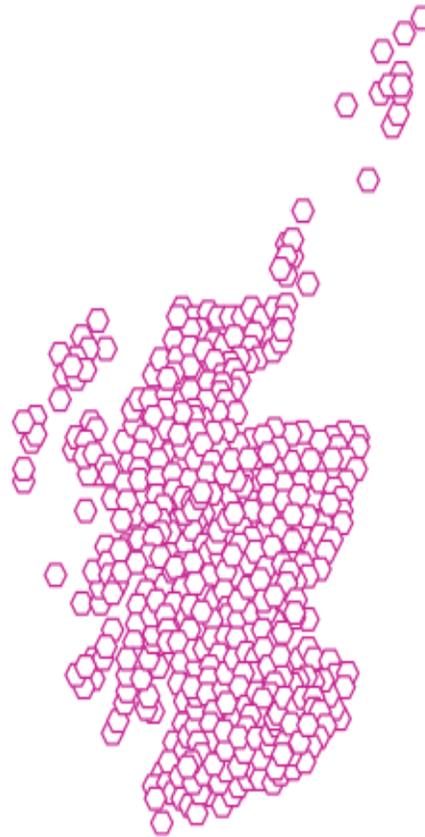

# How is SIMD constructed?

- Scotland is split into 6,976 small areas, called **'data zones'**, with roughly equal populations
- **Indicators** chosen to measure the different aspects of deprivation in each data zone, like pupil attainment, travel time to a GP, crime and unemployment
- Indicators are grouped into seven types, called **'domains'**: *income; employment; health; education, skills and training; geographic access to services; crime; and housing.*
- The seven domains combined into one index, ranking each data zone in Scotland from 1 (most deprived) to 6,976 (least deprived).

# Data zones

- Key geography for dissemination of small area statistics in Scotland and are widely used across the public and private sector.

→ 5.4 million people

→ 6,976 data zones

→ 700-800 people  
per data zone

# SIMD domains and indicators

Employment

Income

# Describing SIMD

| Quintile (20%) | Quintile % Groups | SIMD Ranking |       |
|----------------|-------------------|--------------|-------|
|                |                   | From         | To    |
| 1              | 1 – 20%           | 1            | 1,395 |
| 2              | 21 – 40%          | 1,396        | 2,790 |
| 3              | 41 – 60%          | 2,791        | 4,185 |
| 4              | 61 – 80%          | 4,186        | 5,580 |
| 5              | 81 -100%          | 5,581        | 6,976 |

Quintiles

| Decile (10%) | Decile % Groups | SIMD Ranking |       |
|--------------|-----------------|--------------|-------|
|              |                 | From         | To    |
| 1            | 1 - 10%         | 1            | 697   |
| 2            | 11 – 20%        | 698          | 1,395 |
| 3            | 21 – 30%        | 139,6        | 2,092 |
| 4            | 31 – 40%        | 2,093        | 2,790 |
| 5            | 41 – 50%        | 2,791        | 3,488 |
| 6            | 51 – 60%        | 3,489        | 4,185 |
| 7            | 61 – 70%        | 4,186        | 4,883 |
| 8            | 71 – 80%        | 4,884        | 5,580 |
| 9            | 81 – 90%        | 5,581        | 6,278 |
| 10           | 91 – 100%       | 6,279        | 6,976 |

Deciles

| Vigintile (5%) | Vigintile % Groups | SIMD Ranking |       |
|----------------|--------------------|--------------|-------|
|                |                    | From         | To    |
| 1              | 1 - 5%             | 1            | 348   |
| 2              | 6 - 10%            | 349          | 697   |
| 3              | 11 - 15%           | 698          | 1,046 |
| 4              | 15 - 20%           | 1,047        | 1,395 |
| 5              | 21 - 25%           | 1,396        | 1,744 |
| 6              | 26 – 30%           | 1,745        | 2,092 |
| 7              | 31 – 35%           | 2,093        | 2,441 |
| 8              | 36 – 40%           | 2,442        | 2,790 |
| 9              | 41 – 45%           | 2,791        | 3,139 |
| 10             | 46 – 50%           | 3,140        | 3,488 |
| 11             | 51 – 55%           | 3,489        | 3,836 |
| 12             | 56 – 60%           | 3,837        | 4,185 |
| 13             | 61 – 65%           | 4,186        | 4,534 |
| 14             | 66 – 70%           | 4,535        | 4,883 |
| 15             | 71 – 75%           | 4,884        | 5,232 |
| 16             | 76 – 80%           | 5,233        | 5,580 |
| 17             | 81 – 85%           | 5,581        | 5,929 |
| 18             | 86 – 90%           | 5,930        | 6,278 |
| 19             | 91 – 95%           | 6,279        | 6,627 |
| 20             | 96 – 100%          | 6,628        | 6,976 |

Vigintiles

- In the 1st quintile - within the 20% most deprived in Scotland
- In the 1st decile - within the 10% most deprived in Scotland
- In the 1st vigintile - within the 5% most deprived in Scotland

# SIMD strengths

- Useful index to identify areas with concentrations of need because of its small output areas, accessibility, consistent delivery, and statistical rigour.
- Methodology and indicators are re-evaluated by experts and users of the index upon the release of the next SIMD.

## SIMD allows user to:

Compare overall deprivation of small areas

Compare the seven domains of deprivation

Compare the proportion of small areas in a council that are very deprived

Find areas where many people experience multiple deprivation

Find areas of greater need for support and intervention

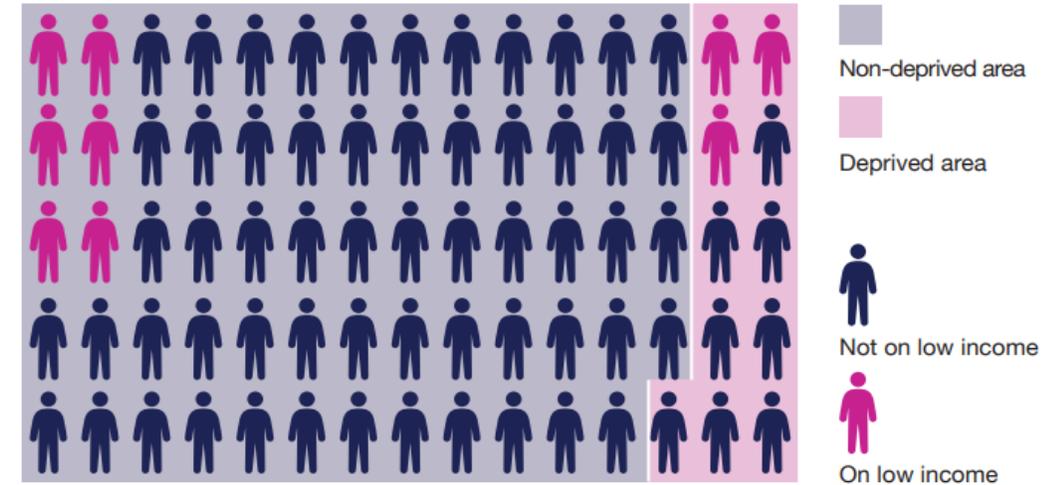

# SIMD limitations

- Identifying all people who are deprived in Scotland – not everyone who is deprived lives in a deprived area
- Saying how much more deprived one area is from another
- Comparing ranks over time
- Comparing with other UK countries
- Reverse causality in health inequalities analysis?

**SIMD identifies deprived areas - not people.**

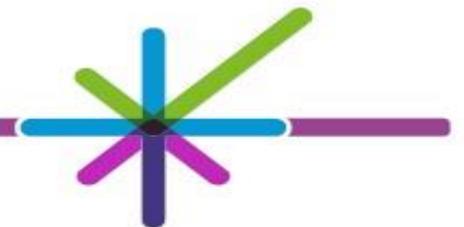

The box below shows why.

**Not all people experiencing deprivation live in deprived areas. About two out of three people on low income do not live in deprived areas.**

**Not everyone in a deprived area is experiencing deprivation. About one in three people living in a deprived area are on low income.**

# Issue of reverse causality?

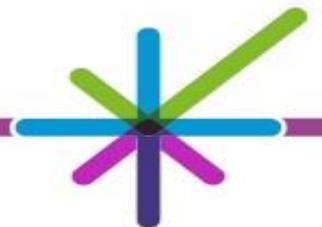

- SIMD includes a basket of weighted health measures raising the theoretical possibility of reverse causality whereby people are ordered by the health outcome rather than socioeconomic deprivation.
- However, health domain weighted to account for a relatively small part of the overall SIMD 
- Analyses of health inequalities were found to give similar results whether the health domain was included or excluded (Source: [Public Health Scotland 2020](#))
- Similar findings reported for England Index of Multiple Deprivation (Source: [Adams and White 2006](#))

**SIMD domain weights**

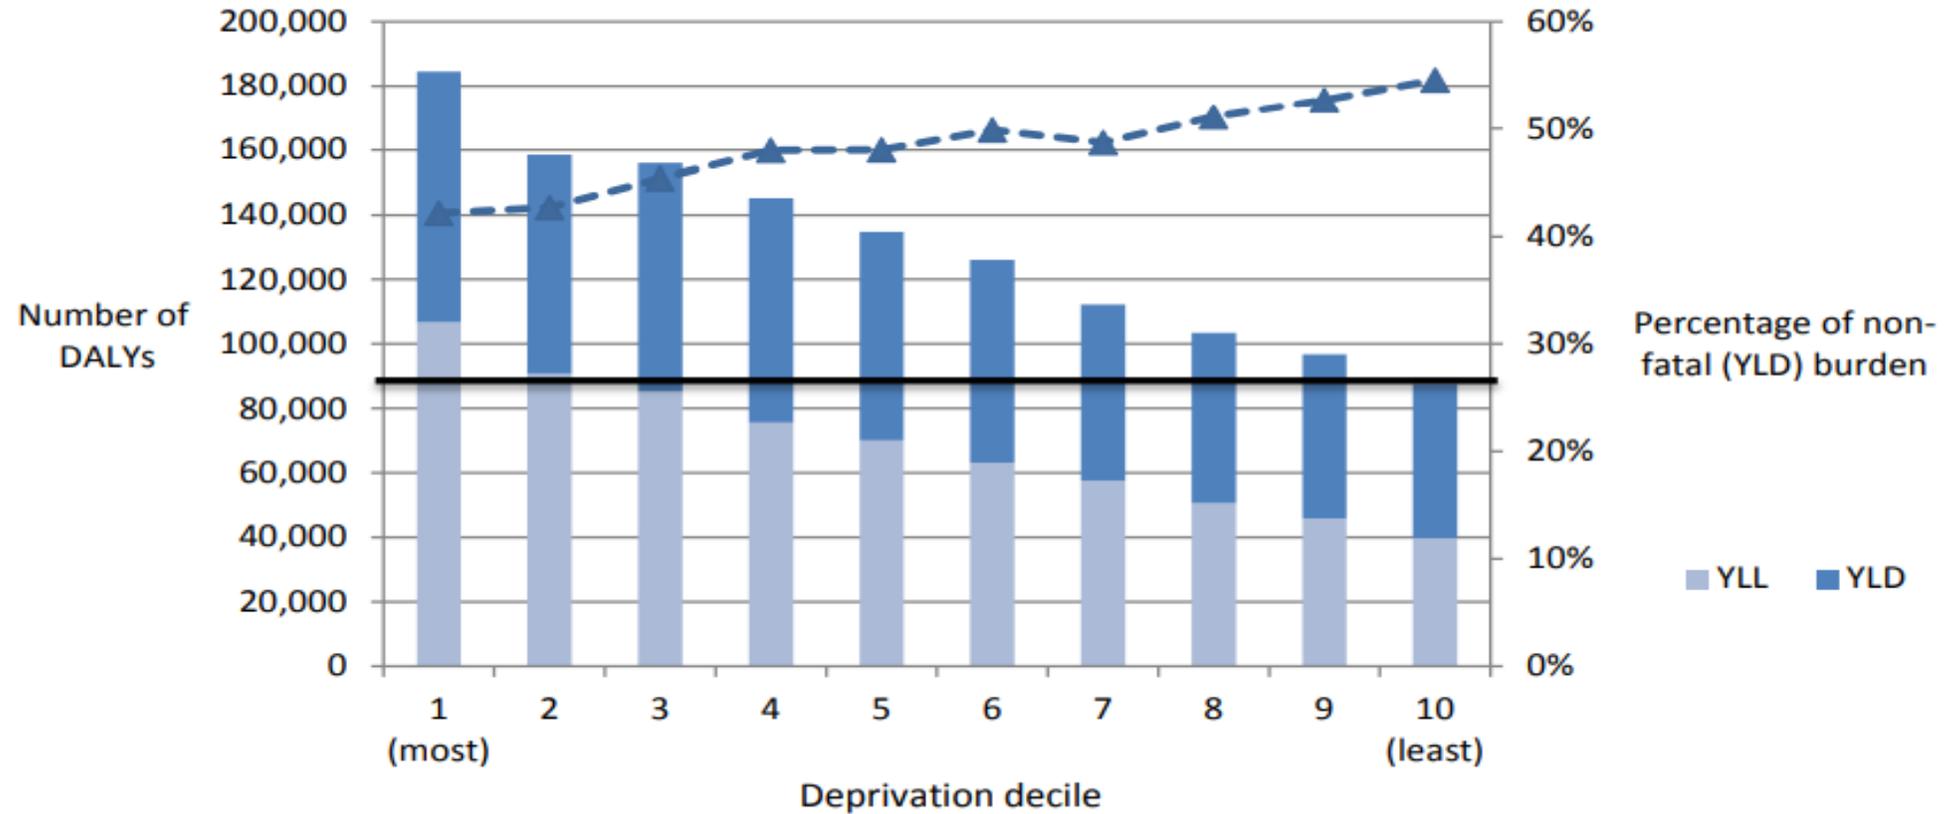

| Domain                         | Percentage of overall SIMD 2020 |
|--------------------------------|---------------------------------|
| Income                         | 28%                             |
| Employment                     | 28%                             |
| Health                         | 14%                             |
| Education, skills and training | 14%                             |
| Geographic access to services  | 9%                              |
| Crime                          | 5%                              |
| Housing                        | 2%                              |

# Applying SIMD to burden of disease estimates

- Use SIMD to group DALYs based on deprivation deciles (from 1 (those living in the 10% most deprived areas) to 10 (those living in the 10% least deprived areas)).
- Estimated inequalities using several measures:
  - absolute and relative range differences between the most and least deprived deciles.
  - Additionally, inequalities were measured using the Slope Index of Inequality (SII) and Relative Index of Inequality (RII)
    - SII and RII describe the *inequality across the full population*

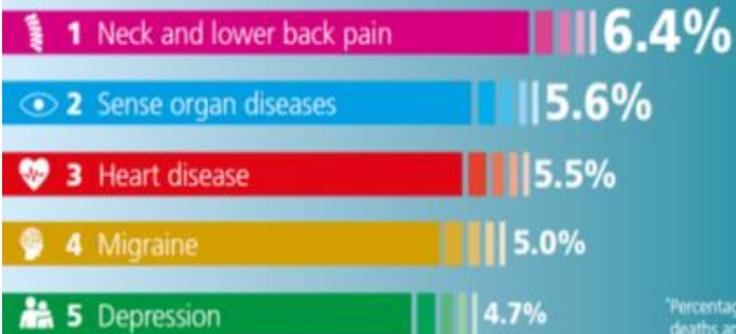

# Number of DALYs by SIMD decile, Scotland, 2016

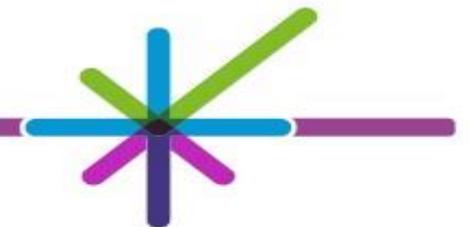

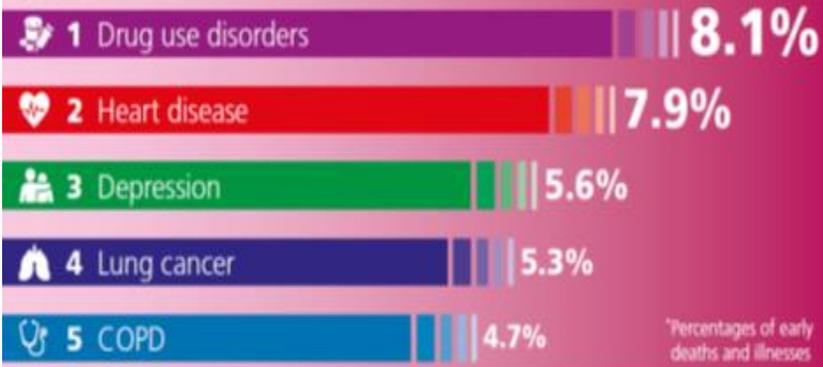

# Absolute and relative outcomes between poorer and wealthier areas Scotland, 2016

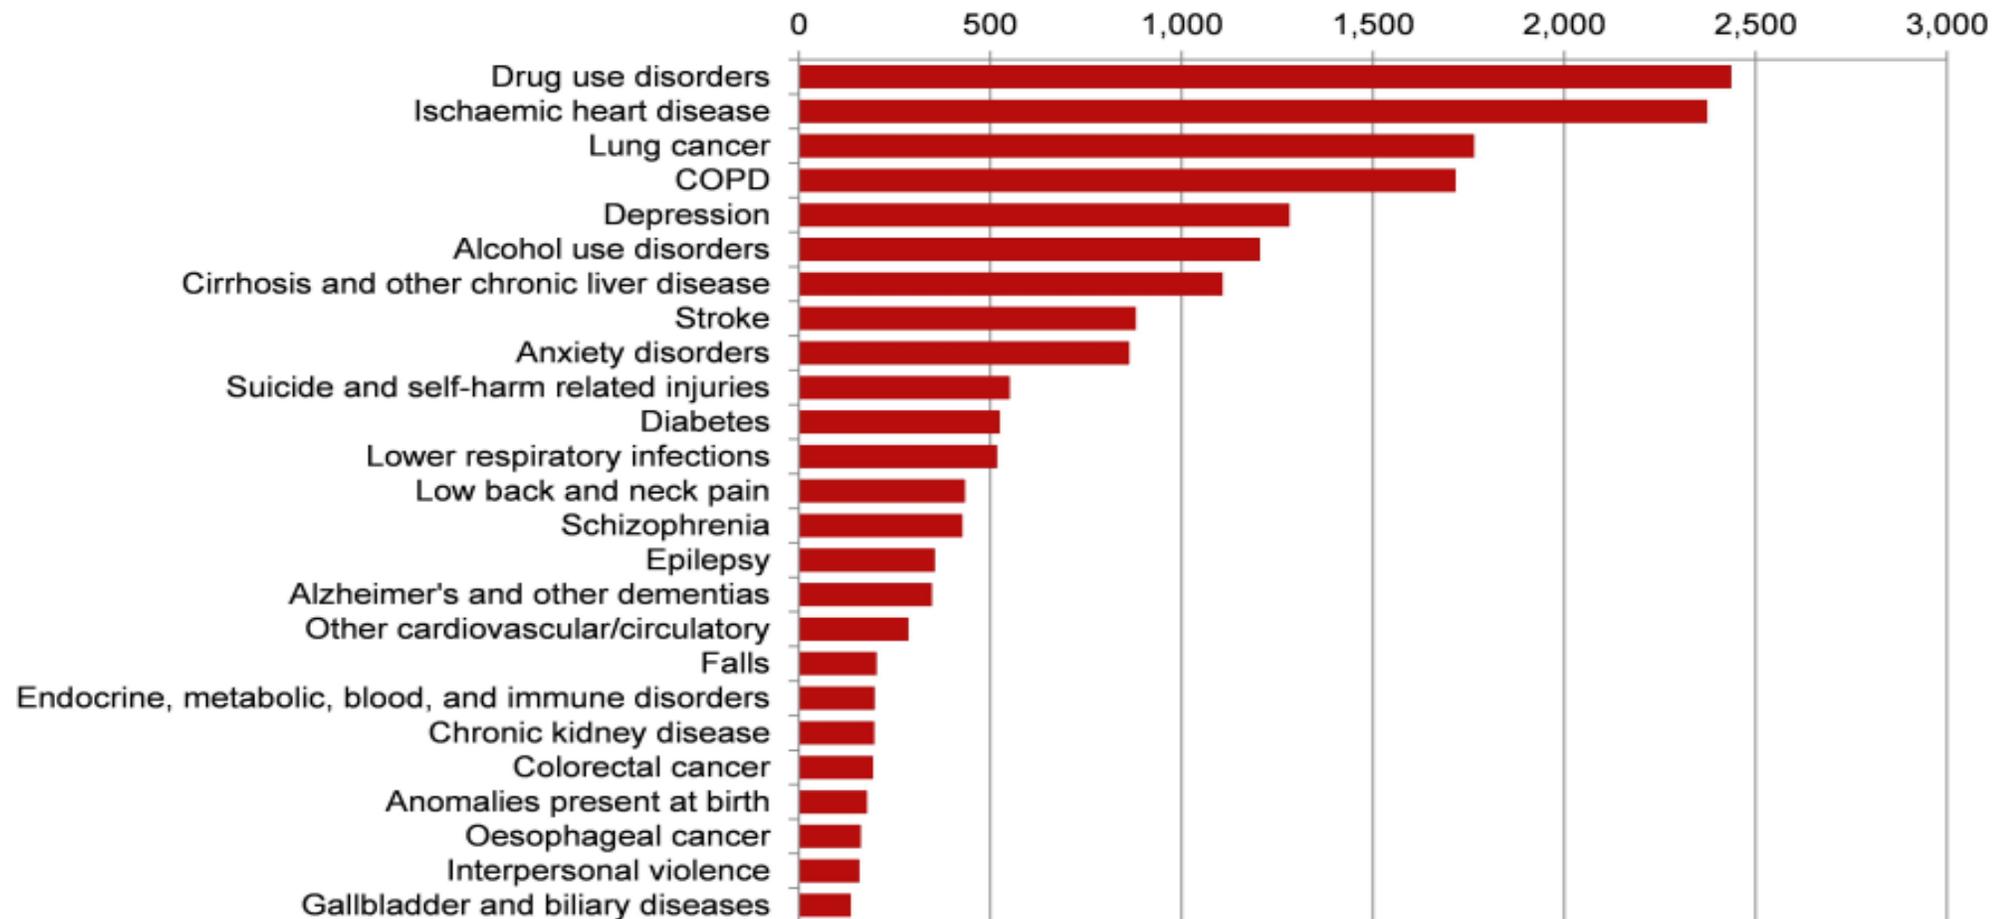

## Leading causes of ill health or early death in our wealthiest areas\*

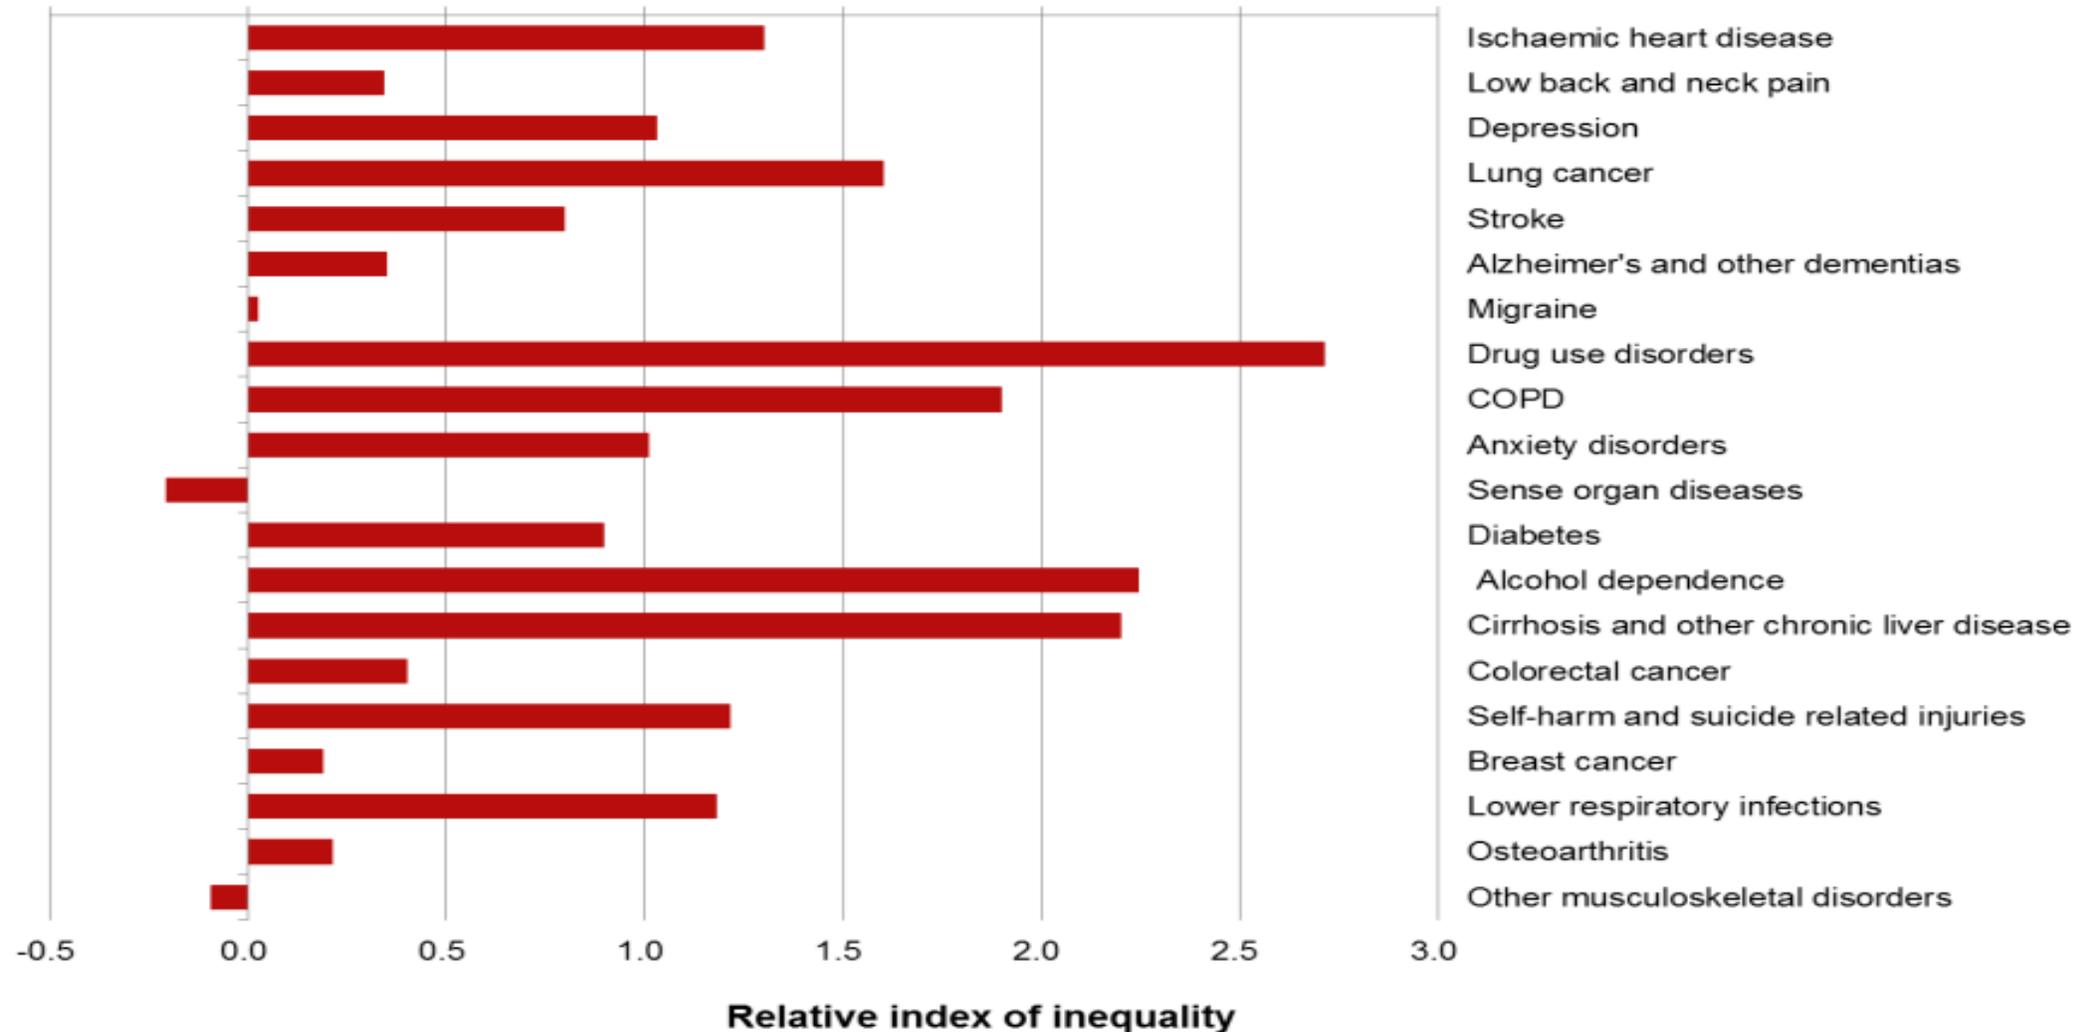

## Leading causes of ill health or early death in our poorest areas\*

# Slope index of inequality, age-standardised DALY per 100,000, population, Scotland, 2014-16

# Relative Index of Inequality for the twenty largest contributors to DALY burden in Scotland, 2014-16

# The leading 10 causes of population health loss and inequalities in Scotland

## Leading causes overall

|                        |
|------------------------|
| Heart disease          |
| Dementia               |
| Drug use disorders     |
| Lung cancer            |
| Stroke                 |
| COPD                   |
| Low back and neck pain |
| Depression             |
| Headache disorders     |
| Other cancers          |

## Absolute inequalities (SII)

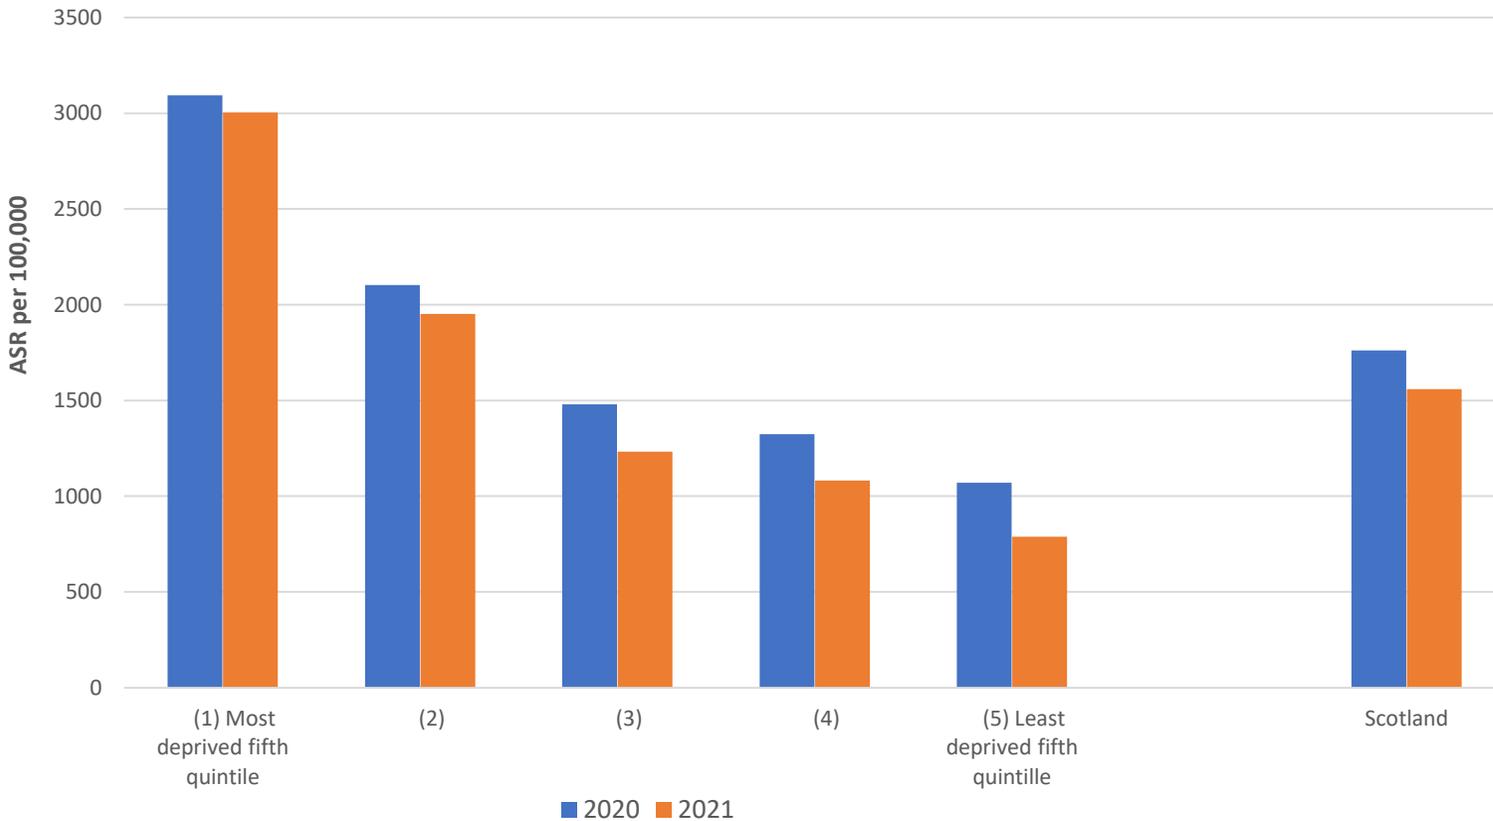

|                        |
|------------------------|
| Drug use disorders     |
| Heart disease          |
| Lung cancer            |
| COPD                   |
| Alcohol use disorders  |
| Depression             |
| Suicide and self harm  |
| Chronic liver diseases |
| Stroke                 |
| Other cancers          |

## Relative inequalities (RII)

|                          |
|--------------------------|
| Drug use disorders       |
| Alcohol use disorders    |
| COPD                     |
| Chronic liver diseases   |
| Schizophrenia            |
| Suicide and self-harm    |
| Lung cancer              |
| Epilepsy                 |
| Heart disease            |
| Other digestive diseases |

# Inequalities in the age-standardised COVID-19 YLL rate in Scotland, by SIMD quintile, 2020 and 2021

COVID-19 YLL rate, by SIMD quintile, Scotland, 2020 and 2021,

| COVID 19 YLL  | 2020 | 2021 |
|---|------|------|
| Absolute difference between most and least deprived fifth (ASR per 100 000) | 2024 | 2217 |
| Relative difference between most and least deprived fifth                   | 2.89 | 3.81 |
| Slope Index of Inequality (ASR per 100 000)                                 | 2414 | 2652 |
| Relative Index of Inequality  | 1.37 | 1.70 |
